

YOUR REQUIREMENT

OUR SOLUTION

You are working with delicate and high quality fabric which requires:

- ▶ low tension, crease free and soft fabric transport
- ▶ for all qualities
- ▶ optimised liquor flow
- ▶ intensive washing action
- ▶ short amortisation time
- ▶ low maintenance costs
- ▶ repeatable finishing results

The range should be easy to run and give the expected finishing results.

This is what you get from the **GOLLER-SINTENSA**:
Wet finishing technology at its best.

Our **GOLLER-SINTENSA** with many features:

- ▶ tailored to your requirements
- ▶ modular system with first class components
- ▶ durable construction
- ▶ economic technology
- ▶ high quality material solidly engineered
- ▶ with PLC-control and recipe administration
- ▶ all fabric guiding elements controlled and synchronised
- ▶ only short unguided distances
- ▶ washing action harmonised with fabric quality
- ▶ weight related wash liquor dosing
- ▶ precise temperature regulation
- ▶ even temperature distribution throughout the whole bath through double walled heating elements
- ▶ heat recovery
- ▶ proportional and precise chemical dosing adapted to liquor flow and fabric weight
- ▶ pH-regulation
- ▶ remote control via modem
- ▶ low tension fabric transport with possibility to shrink
